Refrigerated wine cabinets

Cool eye-catcher with intelligent technology

Wine is not just for enjoyment; it is also a culture and science. For that reason, we developed our refrigerated wine cabinets in cooperation with oenologists.

Effective and innovative

Thanks to cooperation with the specialists in the field of cellar management, we have been able to create perfect storage and temperature conditions in our refrigerated wine cabinets.

The optimum inclined positions of the bottles, minimised vibrations, constant and accurate temperature control down to the degree – all of this guarantees you and your guests maximum wine enjoyment at the very highest level.

Highlights

- ⚙ Inclined support for correct storage
- ⚙ Optional: VARIO inclined support in 3 lengths for midi and magnum bottles as well as regular bottles, also available with a drawer
- ⚙ Enormous storage capacity for up to 156 bottles
- ⚙ Model Twin: Reach-through cabinet with doors on two sides
- ⚙ Minimised vibrations
- ⚙ Silent design for especially quiet operation
- ⚙ Any RAL colours and surfaces
- ⚙ UV-absorbing insulating glass without transparency loss
- ⚙ Interior lighting with dimmable LED light columns
- ⚙ Automatic defrosting device
- ⚙ Exact temperature control and constant interior temperature

Optional:

- ⚙ VARIO inclined support in 3 lengths for midi and magnum bottles
- ⚙ Full extension drawer with perforated shelf base for the best air circulation and vibration-free storage
- ⚙ HZ support system for flexible presentation and storage as well as very easy handling

For heart and mind

Our refrigerated wine cabinets impress with a very successful design and prevail with functional highlights: maximum capacity, perfect storage conditions, optimum presentation, adaptable for different bottle sizes, and it is easy to reach the individual bottles thanks to an optional full extension drawer for the individual supports – you can expect all of this of our refrigerated wine cabinets.

HZ 2 support system with adjustable bracket at the front and back for optimum presentation of small and large bottles.

Inclined support (optionally with full extension drawer)
The perfect angle ensures that the cork is always slightly moistened, but is never too wet.

HZ 1 and HZ 2 support system with full extension drawer. Combination with magnum holder + bracket for individual inclined position.

A configuration with full extension drawers is optionally also possible only on the top or bottom.

Maxi support system

A support system that can be mounted and turned by 90° ensures a perfect all-round presentation.

MODUL – combine individually, control separately

You can combine any number of our high-quality MODUL refrigerated wine cabinets together in a flush-mounted installation or as stand-alone units. Your benefit: Each individual cabinet remains individually controllable. In order to give you maximum individuality, the surfaces are available in all RAL colours.

TWIN – high transparency for perfect presentation

This refrigerated wine cabinet attracts the attention of your guests – and it ensures a perfect view from all sides. Four dimmable LED light columns ensure the right atmosphere through the lighting, and the individually controllable refrigeration system ensures exactly temperature-controlled wine. The design and functionality could not be combined more perfectly.
