

SNACKY

*The combination cases for
hot and cold delights*

SNACKY

Sweet or savoury – hot or cold

Superb presentation – full flavour

Fresh preparation and immediate display function to perfection thanks to the highly transparent SNACKY with its mirrors and natural LED lighting. The glass front can be lifted with a simple handle thus providing the guest with direct access to pure culinary pleasure.

Fresh preparation – front finishing

Takeaway food that offers crispness and flavour is very much in fashion. And guests wish to be able to choose quickly from a range of freshly made items. The SNACKY combined display case provides everything that is needed for the preparation of delicacies right before the eyes of the guest.

An all-day concept – simple, fast, flexible

Constantly having everything ready and close at hand represents an important precondition for efficient preparation in front of the guest. Especially when the SNACKY display is to be changed frequently between breakfast and dinner. However, the case's storage system ensures that none of these issues is a problem.
